Case Studies

The case studies are presented for the two Business Segments that Datapalm Operates. Each case study is classified into “industry” which the client operates in.

- **Business Process Management (BPM)**
 1. Information Technology

Information Technology

- **An IT Product Development Corporation:**
- A popular Gaming App company having customers from across the globe.

- **Problem:**
- The company had a challenge in lead generation and online data collation.
- The results were way below expectations.
- The internal resources were unable to manage the process efficiently.
- Moreover getting and retaining right resources for this process had become another challenge.

Information Technology

(continued..... an IT Product Development Corporation)

- **Solution:**
- Datapalm studied the detailed requirements of the client.
- Created a plan around the process execution and took over the process.
- The client never had an issue in the process since then. All the required data is processed and delivered regularly.
- Datapalm manages and delivers the process with complete visibility and systematic timely reporting to the client.
